

DERWENT

DRAWN TO PERFECTION

TIE DYE WITH INKTENSE

An easy guide to using Derwent Inktense Blocks

WHAT YOU'LL NEED:

- 100% Cotton Fabric (Example: T-Shirt, pillowcase, socks, etc.)
- Derwent Inktense Blocks
- Kitchen Zester
- Derwent Spritzer (or spray waterbottle) pre-filled with water
- Scrap Paper
- Elastic Bands
- Protective Sheet – parchment or baking paper (to cover your workspace and keep it clean)
- Marbles, bouncy balls, cotton balls or anything that can create a ball

STEP 1

Gather all supplies and prepare your work space.

STEP 2

Place the balls under the fabric and secure with an elastic band.

OPTIONS If you don't have these tools, you can simply pinch up the fabric and create a ball shape and secure it with an elastic band.

STEP 3

Fold scrap paper down the middle.

STEP 4

With the kitchen zester, zest Derwent Intense Blocks.

The more you zest, the deeper the pigment will be.

STEP 5

Pour the shavings into the spritzer of water and shake vigorously.

Repeat this with as many colors as you'd like.

OPTIONS You can combine colors to create your own unique color combinations! Blue and Green; Yellow, Orange and Pink; or Pink and Blue.

STEP 6

Spray color all over your fabric.

OPTIONS Be creative! The pigment will sit exactly where you spritz, so make sure all the creases are exposed where you want the color to appear! Use as many colors as you would like - and experiment with the different textures, color runs, and dribble effects you can create with the spritzer.

Let it dry overnight or until touch dry.

STEP 7

Remove the elastic bands from the fabric.

Inktense products are permanent once dry and can be safely washed by hand at a cold temperature (max 30 degrees). We recommend you use water only and avoid harsh detergents.

Enjoy
