ALL COLOURS ARE  
**ASTM  
D-6901**  
100% LIGHTFAST

**100% LIGHTFAST**

Lightfastness refers to the chemical stability of a pigment under long exposure to light. Derwent Lightfast pencils have been formulated to be 100% lightfast, meaning the core is resistant to colour change. This ensures artwork will not fade for up to 100 years under museum conditions.

Tested in both Florida and Arizona, under the harshest conditions, pigments are certified for lightfast quality using indoor accelerated weather machines and out in the baking Arizonian sunlight.

All colours comply with internationally recognised lightfast testing standard ASTM D6901 as well as Blue Wool Scale ISO 105.

**ASTM D6901:** A scale of LFI-V with values LFI 1 and LFI 1 resisting fading for up to 100 years

**Blue Wool Scale ISO 105:** A scale of 1-8 with values of 6-8 resisting fading for up to 100 years.

DERWENT

## Train the trainer

2

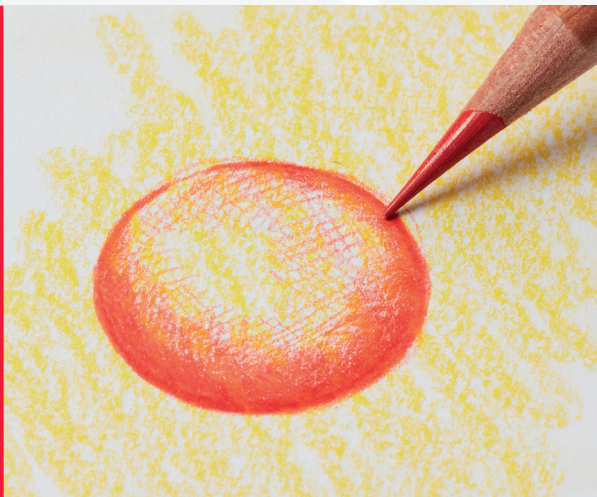

### OIL-BASE

#### MIXING

The greater ratio of oil to wax in these pencils creates a buttery, velvety texture allowing complete integration of colours. A pencil blending medium can be used with a paint brush to mix colours directly on a paper or canvas surface.

TEXTURE

#### LAYERING

With an opaque laydown, dark colours applied with the precision of a hard sharp point will sit well over lighter shades for effective outlining and defining negative space.

Derwent Lightfast pencils are also ideal for use on coloured papers due to their high performance and opacity. The range has a higher proportion of pigment than any other Derwent pencil.

3

### BROADEST COLOUR SPECTRUM

Derwent Lightfast offers the broadest colour spectrum of 100% lightfast pencils on the market, including many bright colours.

Derwent Lightfast are also the only oil-based lightfast pencil range.
