Scale of 0-5, where 5 is the most blendable, erasable etc.

# DERWENT

## Train the trainer

### STRIKING ON BOTH LIGHT AND DARK SURFACES

The Derwent Metallic Paint collection includes a strong array of shimmering metallic colours; extending beyond just traditional golds and silvers, to offer brights and pastels to a wide range of art and craft projects. The colour palette has been carefully developed to work well on both black and white paper.

As most metallic paint collections are only suitable for black paper, dark colours are rarely included in the assortments. Derwent Metallic Paint includes a dark graphite colour, which is useful for adding depth to work on both black and white surfaces.

### LIGHT OR OPAQUE WASHES

A light wash of Derwent Metallic Paint creates a translucent effect. Opaque applications can be achieved by layering, when the paint is wet or dry, or by applying in thicker coats.

Derwent Metallic Paint mixes very well on the mixing pallet provided, allowing artists to experiment with many different colours using the 12 paint pans provided.

### SHIMMERS FROM ALL ANGLES

Derwent Metallic Paint offers an exceptional sheen, with metallic pigments glinting from all angles on the page. A striking shimmer can be seen when surfaces are tilted.
