ULTRA SOFT, VELVETY TEXTURE

Derwent Coloursoft Pencils are highly blendable due to the ultra soft texture. This softness allows for dense application of colour, which is ideal for use on a full range of substrate colours, including mid-tone and dark papers.

Try using the Derwent Blender Pencil alongside this range for extended blending techniques.

RAPID APPLICATION OF COLOUR

Softness also means colour pigment transfers to paper surfaces extremely quickly. This is useful for large swatches of colour featured in many drawing styles; from bold landscapes to detailed illustrations, portraiture and fashion design.

The Derwent Coloursoft Pencil is an ideal entry into colour pencil media and favoured by many artists.

BOLD COLOUR PALETTE

Derwent Coloursoft Pencils offer the boldest colour range in the Derwent colour pencil collection. Pigments are very vibrant with high colour saturation. Available in 72 colours, the blendability also allows for an infinite spectrum of rich colour.
