UNIQUE PAINT EFFECTS

Derwent Paint Pens are a creative drawing and painting tool, containing highly pigmented, opaque acrylic paint. Use them to create fine lines, large layers and imaginative paint splatters.

To activate press the nib for 10 seconds (do not pump) and release to allow the paint to flow into the nib. If this does not happen repeat the process.

To clean remove the nib from the well, submerge in water for 10 minutes and wipe with a damp cloth. Replace nib into pen when finished. Removing the nib is also useful for creating splatter effects by tapping or flicking the barrel towards the page/surface.

PERMANENT ONCE DRY

Choose from a wide selection of vivid, opaque colours which can be layered and blended.

Dilute with water and brush whilst wet to create transparent washes. Once dry, colours are permanent and fixed. Ideal for wet and dry media techniques in conjunction with other media.

Derwent Paint Pens replaced "Derwent Graphik Line Painters" in 2019. The range was split into 4 colours palettes and packaging was updated to be eco-friendly.

USE ON A RANGE OF SURFACES

Derwent Paint Pens are also suitable for use on fabric, glass and wood allowing for endless sketching and painting possibilities for a wide range of projects.

Professional quality, all colours are highly lightfast, ensuring your artworks will withstand the test of time. High-quality 0.5mm Japanese break resistant nib.
