Scale of 0-5, where 5 is the most blendable, erasable etc.	

*Lightfast, colours remain the same for 100 years under museum conditions

DERWENT

Train the trainer

1

CONSISTENT LINES

Derwent Line Makers offer free-flowing, consistently smooth lines; important for both drawing and writing. Ink won't dry out or interrupt the flow across the page. Create beautiful opaque, solid lines with speed - ideal for artwork and hand lettering either in the studio or when on location.

2

PERMANENT ONCE DRY

Derwent Line Makers contain water-based ink which dries very quickly after application, and will not move once dry.

Water-soluble media such as Derwent Inktense can be layered over the top without affecting the lines already on the page. Ideal for a variety of mixed media techniques.

Derwent Line Makers replaced "Derwent Graphik Line Makers" in 2019. The formulation was improved to become water-proof following consumer insights.

3

HIGH QUALITY JAPANESE NIB

Widely regarded as the gold standard in quality, Derwent Line Makers feature Japanese nibs that are highly durable.

Nib sizes range from a super-fine 0.05 to a bold 0.8 (black only).
