### GRAPHITE AND COLOUR COMBINED

Available in two media types, and uniquely combining watercolour pencil pigments with graphite, this range is ideal for mixed media work.

Graphitint Paint features fine graphite particles that settle into the paper grain to create a myriad of effects. Apply on a cold pressed watercolour paper to bring out pools of granulations and passages of tone and colour.

### MIX WITH WATER TO ACTIVATE RICH SHADES

Used dry, Graphitint provides just a hint of colour but adding water transforms the tint into rich vibrant shades. Graphite and colour in one pencil, with the added advantage that they erase easily from the page.

Graphitint Pencils will explode with colour when water is added with an underlying graphite sheen.

### MUTED COLOURS

“Graphitint’s muted colours make it perfect for my drawings, from autumnal landscapes to portraits in a palette of warm and cool tones. With a smoother, waxier feel than a conventional graphite pencil and a dash of subtle colour.

Derwent Graphitint are my go to sketching pencil, with a waterbrush on hand to help transform Graphitint into beautiful muted colour tones”
