WATER-SOLUBLE GRAPHITE

3 SECOND SELL

- 1** Add water to gently dissolve graphite
- 2** Pure compressed graphite sticks for quick coverage (Derwent Graphitone)
- 3** Delicate graphite washes, easy to blend and layer (Derwent Water-soluble Sketching)

ADD WATER TO GENTLY DISSOLVE GRAPHITE

While graphite as a material is naturally water-soluble, Derwent's water-soluble graphite ranges have been specifically formulated to increase solubility. The graphite content gently dissolves when water is added to create softer techniques.

<input type="checkbox"/> Point strength	4
<input type="checkbox"/> Available individually and in blisters	

*Lightfast, colours remain the same for 100 years under museum conditions

DERWENT GRAPHITONE

Derwent Graphitone is a woodless pencil. Artists can use wet or dry as with other traditional water-soluble graphite pencils, however the pure graphite stick can also be broken into chunks to create broad sweeps. Perfect for expressive sketching and drawing.

Available in 4 degrees; 2B (Light Wash), 4B (Medium Wash), 6B (Dark Wash) and 8B (Very Dark Wash), with easy-peel wrappers.

Derwent Graphitone Pencils can be erased once dry.
