

GBC 5031 Feeder

1711717P

Product Description

Automated feeder connects to the 5031TS Laminator to increase efficiency and accuracy. The smart design incorporates a hinge for the feeder to swing out for easy access to the bottom roll of film on the laminator. It then swings back and locks into place to ensure proper alignment. A quick change delivery system accommodates a wide range of paper stock for accurate feeding. The adjustable feed roller pressure ensures an even surface, which in turn, enables the laminator to create smooth, flat output.

Features

- Handles paper stock ranging from 20 lb. bond to 24 pt. cover stock
- Adjustable vacuum eliminates double feeding of stock
- Adjustable side guides enable straight sheet feeding
- Sheet length and gap settings can be precisely set
- Sheet feed counter tracks input

Specifications

- Core Diameter 3"
