Features

- EZLoad technology helps eliminate film loading errors. Color coded light blue and dark blue end caps show the correct way to load film, which avoids accidental upside down loading.
- GBC EZLoad NAP II Laminating Film 12" x 100' is compatible only with GBC Ultima 35 Laminators, which have blue saddles
- Choose the right film for your job. The 5 mil thickness provides semi-rigid protection. Select 10 mil if you need something protective and fully rigid.
- NAP II film is typically used for projects with heavy ink coverage or delicate items
- Keep your documents bright and bold. Glossy film has a shiny finish that helps emphasize colors.
