Features

- EZload technology eliminates film loading errors. Color coded light blue and dark blue end caps show the correct way to load film, which avoids accidental upside down loading.
- Keep your documents bright and bold. Glossy film has a shiny finish that helps emphasize colors, making it the perfect choice for photos, signs and posters.
- Choose the right film for your job. The 3 mil thickness provides protection while retaining moderate flexibility. Each roll is 11.5" x 200' and wound on 1" core. Pack includes 2 rolls.
- Compatible only with GBC Ultima 35, Sprint H925 and Sprint H950 Thermal Laminators. NAP II is used on heavy ink items or on heat-sensitive materials.
