Features

- EZload technology eliminates film loading errors. Color coded light blue and dark blue end caps show the correct way to load film, which avoids accidental upside down loading.
- Keep your documents bright and bold. Glossy film has a shiny finish that helps emphasize colors, making it the perfect choice for photos, signs and posters.
- Choose the right film for your job. 5 mil thickness provides protection while retaining limited flexibility. Each roll is 11.5" x 100' and wound on 1" core. Pack includes 2 rolls.
- Compatible only with GBC Sprint H925 and H950 Thermal Laminators, which have blue saddles. NAP II is used on heavy ink items or on heat-sensitive materials.
