Features

- Load film into your laminator using patented, lightweight AutoGrip shafts or traditional steel shafts, which utilize thumb screws and core chucks.
- Give your documents a professional finish. Matte film does not reflect light, which creates a polished look. Perfect for bus tags and folders.
- Choose the right film for your job. 5 mil thickness provides protection while retaining limited flexibility. Each roll is 18" x 200' and wound on a 1" core.
- NAP II is typically used on heavy ink documents or for laminating heat-sensitive materials. It is compatible with most thermal roll laminators, including the GBC Pinnacle 27.

Specifications

- **Box Quantity** 1 roll
- **Color** Clear
- **Core Diameter** 1"
- **Film Type** Thermal - Low Temp
- **Finish** Matte
- **Warranty** None
- **Roll Length** 200'
