### Features

- Load film into your laminator using patented, lightweight AutoGrip shafts or traditional steel shafts, which utilize thumb screws and core chucks.
- Keep your documents bright and bold. Glossy film has a shiny finish that helps emphasize colors, making it the perfect choice for photos, signs and posters.
- Choose the right film for your job. The 3 mil thickness provides protection while retaining moderate flexibility. Each roll is 12" x 500' and is wound on a 1" core. Pack includes 2 rolls.
- NAP II is typically used on heavy ink documents or for laminating heat-sensitive materials. It is compatible with most thermal roll laminators, including the GBC Pinnacle 27.

### Specifications

- **Core Diameter** 2.25"
- **Film Type** Low Temp
- **Finish** Gloss
- **Roll Length** 500'
