### Features

- Dual heated rollers make most applications, including encapsulation, easy while superior roller technology delivers better processing of soft substrates

- Laminates graphics up to 61" wide

- Capable of laminating at speeds up to 20'/minute

- 1 1/2" manual nip adjustment allows for precise operation and accommodates most substrates

- Roll-to-roll operation (from bottom unwind) to accommodate applications including vehicle wraps

- 14.28 lbf/in (2.5n/mm) line pressure for superior cold lamination

- Lightweight drop-in supply shafts with auto-grip for easy loading of materials in tight spaces

- Auto-grip upper take-up shaft for winding release liners

- Exclusive 'stay-put' swing up feed table keeps table up, making media handling and set-up a snap and flip up pull rollers for no hassle loading

- Comprehensive safety system with emergency stops and self-checking safety eyes

- Foot switch for hands free operation

- Ergonomic touch pad control panel

- Image guide to ensure perfect alignment and roll trough to keep rolled prints in place before and during lamination both standard

- Optional easy-in feed table and slitter to make laminating a snap while the optional fan banks cools the machine down when both rolls are heated

### Specifications

- **Heated Rollers** Dual
