Kensington®

MicroSaver® 2.0 Keyed Chassis Lock — Supervisor Keyed

K64430S

Product Description

The MicroSaver 2.0 Keyed Chassis Lock with Master Key access for supervisors prevents unwanted access to the sensitive data and components of devices like a desktop computer or server. By locking down the chassis, it secures the valuable components housing information inside, such as the hard drive, CPU and graphics card of a desktop computer.

Features

- Tough 10mm lock head secures the computer cabinet to prevent theft of components and data, including the CPU, graphics card and hard drive

- 5mm Keying System featuring patented anti-pick Hidden Pin Technology is compatible for custom solutions across different styles of Kensington locks

- T-Bar™ Locking Technology attaches to any device featuring the industry-standard Kensington Security Slot™

- Supervisor Keyed allows lock access only to authorized administrators

- Register & Retrieve™ program allows you to order replacement keys
