

## Wired Keyboard for iPad® with Lightning™ Connector

72447

### Product Description

The education solution from Kensington that offers an easy way to meet Common Core Standards when conducting tests with iPad tablets. Designed for the iPad Air™ and iPad 4th gen, this Kensington Wired Keyboard features a Lightning connector that provides easy plug and play installation without any software or drivers and eliminates the need to pair the tablet and keyboard. Because it's wired, there's also no need for batteries or recharging. The full-size keys are highly durable and tamper-resistant so they're far less susceptible to popping off or getting pried up.

### Retail Packaging Information

Depth	30mm
Width	460mm
Height	160mm
Gross weight	0.74kg
UPC#	5028252439718
Unit quantity	1

### Master Case Information

UPC#	5028252443203
